

## Leverage Existing IT Infrastructure

Today's IT departments are challenged to do more with fewer resources. You are tasked with maintaining ever more complex infrastructures while simultaneously managing new projects with limited resources. In addition, many third-party software interfaces may require you to rework some of your existing systems.

Cforia understands the challenges of today's IT departments. Our product's open architecture is designed to minimize IT resource requirements, leverage current investments and deliver an outstanding return on investment. Cforia works around your requirements, not the other way around. Our applications are designed to overlay your accounting system(s) and preserve all of your existing technology investments. As a result, installation is done in hours and the implementation completed in a few weeks. Typical IT resource requirements are less than three days for the entire project. Once implemented, system changes can be handled by the users without relying on the help of IT Professionals.

*"Cforia's integration strategy minimized our total cost of ownership and preserved all of our existing technology investments. Finally a third party software provider understands that integration is a key component of a project's success."*

*-Bobbi Sy  
IT Director, Citizen Watch USA*

Open Architecture

Disparate ERP Systems

Inourced Support

Private Cloud Support

Fast Implementation

Real-Time Data Integration

## The Cforia Solution for IT Professionals:

- **Open Architecture:** Protects your existing IT investments and avoid added IT departmental support requirements by integrating with your existing corporate systems.
- **Disparate ERP Systems Consolidation:** Cforia's database has extensive user fields and flexible table mapping that allows our system to accommodate your ERP system or disparate systems with their unique customizations.
- **Inourced Support:** Cforia remotely configures and administers our system that resides behind your corporate firewall, so that data is synchronized at Gigabit Ethernet Speed and system security meets your corporate standards.
- **Private Cloud Support:** Offers Cforia's A/R Automation as private cloud technology that is housed within Cforia's highly fault tolerant and secure data center. Data is incrementally synchronized over a dedicated VPN tunnel. Cforia is responsible for all hardware and system administration.
- **Fast Implementation:** Cforia Technical Resources take complete responsibility for installation, implementation and training. In just a few weeks Cforia is in and out and your A/R Department is up and running
- **Real-Time Data Integration:** Minimize system loads and avoid batch window issues through incremental data synchronization between Cforia and source ERP system or disparate systems.

## Business Benefits:

- Avoid IT overhead by reusing your existing technology
- Unique implementation and support avoids burdening IT groups
- Real-Time Integration that avoids system load and batch window issues

## About Cforia Software:

Cforia Software was founded in 2001 by technology veterans with extensive experience in ERP applications like SAP, Oracle, PeopleSoft and JD Edwards.

Today, Cforia is a global company that provides industry leading Order to Cash Automation that is used by large corporations to manage over \$186 Billion in yearly A/R. Some of our largest customers include Textron, Thermo Fisher Scientific, Citizen Watch and NAPA Auto Parts. Cforia's rapid growth is driven by superior technology that includes real-time data integration across disparate ERP systems, order hold management, separate clean and dirty receivables tracking, plus handles multi-currency, multi-languages and multi-business units.

## Our Data Integration Connectors provide faster implementation with greater functionality.

Cforia Data Integration Connectors facilitate rapid real-time integration with your corporation's existing ERP systems, Document Imaging, third party credit data, email and facsimile servers. Our pre-packaged real-time connectors keep Cforia's Order to Cash Database continuously up to date to assure efficient functionality throughout our product suite. Pre-packaged connectors greatly shorten project timing and risk by avoiding custom data integration.

## Save time and expense by avoiding custom programming.

Cforia's Order to Cash Software is designed to allow users to create automated dunning and collection letters, change collection logic and create reports themselves. Finance department professionals have total control through setting changes and drag and drop wizards that perform complex tasks such as creating letters with data merges and reporting without programming.

For example, your department can now create a custom collection letter in minutes and send it to thousands of selected recipients automatically. Without having to wait for over burdened IT programmers or outside consultants.

## Cforia Order to Cash Automation Platform:

Cforia Software has the most comprehensive credit, collections and deductions software in today's market. It is the only complete receivable automation system and offers a variety of solutions to better manage your company's credit, collections and deductions.

At the heart of this solution, is our software's capability to integrate with other accounting software and collection tools in real-time.

The implementation of Cforia's Real-Time Database allows for efficient, updated functionality in all areas of the product suite: Order to Cash Workbench, Online Payments & eBilling Portal and Cash Application Automation.
