

A/R Department's Sole Working Platform

In today's competitive market, A/R Departments carry a huge part of the responsibility for reducing DSO, preventing bad debt expense and maximizing cash flow. Enterprise software vendors have ignored this process and have forced A/R professionals to use a number of disconnected and manual tools to handle their responsibilities. How many reports, accounting system inquiries, notes, fax machines, emails and phone calls do you use in a day?

Cforia Software provides A/R Professionals with a sole working platform that streamlines and simplifies every task you perform. It is a tightly integrated system that overlays your accounting software to be the single interface for all A/R activities. With functionality in areas such as an A/R Collaboration Portal and a Credit, Collections and Deductions Workbench, transform your A/R Department into a paperless environment where mundane daily tasks are automated. With Cforia, Accounts Receivable Professionals finally have a product designed specifically to meet their unique challenges.

"Cforia Software gives Dorman a unified view of our A/R across all of our systems. This enabled key A/R processes to become database and computer driven instead of Excel spreadsheet driven."

*- Joe Yackanicz
Director of Customer Financing
Dorman Products*

The Cforia Solution for A/R Professionals:

- Rules Based Collections
- Promise-to-Pay Tracking
- Support Point-Of-Sale with Real-time held order management
- Days Beyond Terms calculation and trend analysis of every customer's payment pattern against the unique terms of all invoices.
- Built-In Report Writer that automates cash forecasting and measures key A/R metrics across Corporate, Departmental and Individual Collector
- Separate "clean and dirty" receivables tracking to reduce Days Deductions Outstanding
- "What You See Is What You Get" programmable Electronic Dunning
- Prioritized Activity Reminder System that ensures order-hold and release activities and other high-impact tasks are accomplished in a timely and efficient manner
- Deductions coding and database driven follow up
- Real-Time integration with single and disparate ERP landscapes

Business Benefits:

- Improve Cash Flow
- Increase Collector Efficiency
- Streamline Order/Hold Release
- Cash Flow Forecasting
- Segregate Disputes from Collections
- Improve Deduction Recovery and Cycle Time

Real-Time Data Integration

About Cforia Software:

Cforia Software was founded in 2001 by technology veterans with extensive experience in ERP applications like SAP, Oracle, PeopleSoft and JD Edwards.

Today, Cforia is a global company that provides industry leading Order to Cash Automation that is used by large corporations to manage over \$186 Billion in yearly A/R. Some of our largest customers include Textron, Thermo Fisher Scientific, Citizen Watch and NAPA Auto Parts. Cforia's rapid growth is driven by superior technology that includes real-time data integration across disparate ERP systems, order hold management, separate clean and dirty receivables tracking, plus handles multi-currency, multi-languages and multi-business units.

Our Data Integration Connectors provide faster implementation with greater functionality.

Cforia Data Integration Connectors facilitate rapid real-time integration with your corporation's existing ERP systems, Document Imaging, third party credit data, email and facsimile servers. Our pre-packaged real-time connectors keep Cforia's Order to Cash Database continuously up to date to assure efficient functionality throughout our product suite. Pre-packaged connectors greatly shorten project timing and risk by avoiding custom data integration.

Save time and expense by avoiding custom programming.

Cforia's Order to Cash Software is designed to allow users to create automated dunning and collection letters, change collection logic and create reports themselves. Finance department professionals have total control through setting changes and drag and drop wizards that perform complex tasks such as creating letters with data merges and reporting without programming.

For example, your department can now create a custom collection letter in minutes and send it to thousands of selected recipients automatically. Without having to wait for over burdened IT programmers or outside consultants.

Cforia Order to Cash Automation Platform:

Cforia Software has the most comprehensive credit, collections and deductions software in today's market. It is the only complete receivable automation system and offers a variety of solutions to better manage your company's credit, collections and deductions.

At the heart of this solution, is our software's capability to integrate with other accounting software and collection tools in real-time.

The implementation of Cforia's Real-Time Database allows for efficient, updated functionality in all areas of the product suite: Order to Cash Workbench, Online Payments & eBilling Portal and Cash Application Automation.
